WIRE SHELVING

Metro Super Erecta Wire Shelves

The Super Erecta® wire shelving features an innovative open wire design that reduces dust buildup, promotes air circulation, and improves visibility and light penetration. Constructed from heavy-gauge carbon steel or Type 304 stainless steel, these shelves are built for durability and available in various finishes to suit different environments, including rust-resistant Metroseal™ Epoxy with Microban® protection. Their versatile design allows for numerous configurations, easy assembly without tools, and adjustable shelves at 1" intervals, making them perfect for evolving storage needs. Shelves can be accessed from all sides, maximizing space utilization, while adjustable feet ensure stability on uneven surfaces.

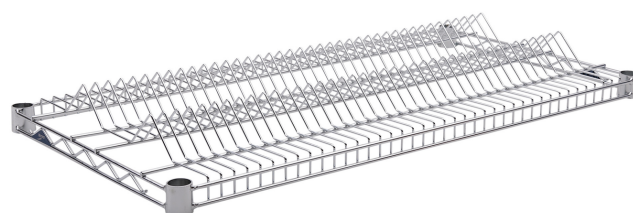

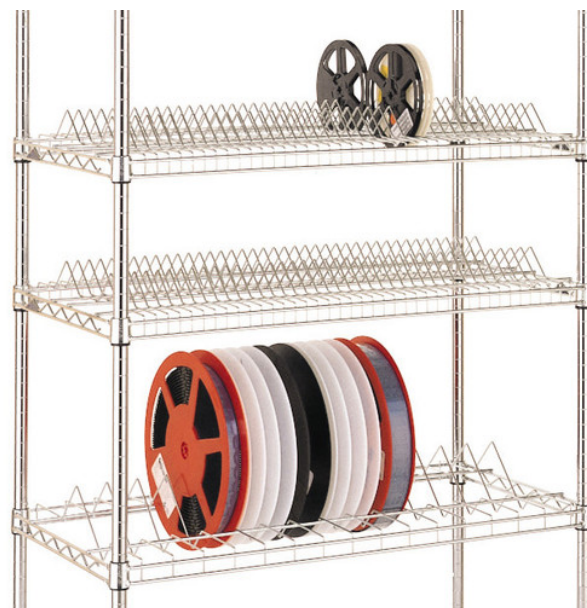

**Load Capacity 900kg / Shelving Unit
and 360kg /shelf**

Super Erecta SMT Reel Shelves

SMT component Reel Shelving offers an efficient method of storage and transport for standard size component reels. These Super Erecta Brite plated shelves can be mixed and matched with standard Super Erecta shelving, posts and casters to create a reel handling and storage system to address the exacting needs of PCB manufacturers. 15-reel capacity for 13" (330mm) – 15" (381mm) reels. 78-reel capacity for 7" (178mm) reels.

CARTS

The Super Erecta Shelf® SP Series utility carts are versatile, heavy-duty solutions ideal for transporting materials in various environments. With customizable configurations of wire shelves, casters, and integrated handles, they're available in 2- or 3-shelf models and multiple sizes. Choose from three finishes: stainless steel for wet or corrosive settings, chrome for dry environments, and economical Super Erecta Brite for standard applications. Featuring a modular design for easy assembly and quick shelf adjustments, these carts offer high maneuverability and durability, with open-wire construction that maximizes airflow and visibility while minimizing dust.

Load Capacity 500kg / Cart

Mobile Post

Suitable to casters for the assembly of wire carts.

OTHER ACCESSORIES

Shelf Dividers

Designed for Super Erecta and Super Adjustable shelves, these sturdy, pressure-fit dividers help keep shelf contents organized. Available in 8" (203mm) and 21" (533mm) heights, they come in Chrome, Metroseal Green (K3) with Microban, Metroseal Gray (K4) with Microban, and Stainless Steel finishes. Note: dividers are not stackable. For OTR applications, additional clamping may be required to secure dividers—consult Metro engineering.

TABLEWORX

Metro TableWorx

The TableWorx serie is a modular platform of high-performance work tables, designed to provide fully customizable solutions. Constructed entirely from Type 304 stainless steel, these tables feature a reinforced work surface with hat channels and 90-degree turned-down edges on all sides for a sleek and functional finish.

Available in adjustable heights (ranging from 86.4 cm to 99.1 cm), these tables are ideal for both stationary setups, with leveling feet, and mobile applications, with optional caster compatibility. Additionally, accessories like backsplashes, overhead shelves, and grids allow you to optimize every inch of space, enhancing productivity and comfort.

Built to last and engineered for versatility, TableWorx are the perfect choice for professional performance and tailored solutions.

Metro TableWorx Productivity Riser

Enhance the efficiency of your workspace with the Metro TableWorx Productivity Riser, designed to optimize the performance of your table.

This riser features a rear cantilevered solid overshelf made from type 304 stainless steel with a depth of 305 mm and a SmartWall grid 610 mm high, in 304 stainless steel. The SmartWall grid is compatible with a wide range of accessories, including hooks, baskets, and shelves (sold separately). Its hanging rail also doubles as a bin holder along the full length of the table.

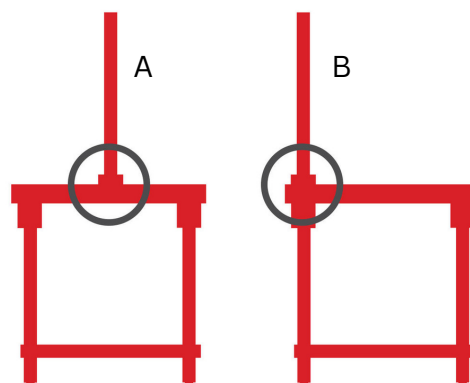

The riser mounts at the rear of the table, staying entirely within its footprint to maximize workspace efficiency. In alternative they can be mounted in the middle of the table to create two opposite working place.

Please note: TableWorx productivity risers are exclusively compatible with TableWorx work tables and can be easily added or removed as needed.

B) The riser is mounted at the rear of the work table

Metro Stainless Steel Drawers

The stainless steel drawers are crafted from 304 stainless steel, ensuring a sturdy, no-flex design. With compact dimensions and a weight capacity of up to 16 kg per drawer, they can be stacked up to 3 units high. They offer flexible mounting options: right, center, or left. The drawers are easy to remove, equipped with heavy-duty ball bearing slides, and feature a flush front that aligns with the work surface. The Add-a-Drawer system allows for customized configurations.

SECURITY CARTS

Metro Mobile Security Shelving

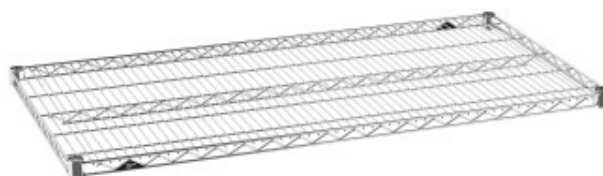

Super Erecta® security units provide safe storage and protect valuable materials and sensitive items from theft or loss. The heavy-gauge open wire construction ensures full visibility of the contents, making inventory checks easy. Optional, adjustable intermediate shelves adapt easily to changing needs, thanks to a patented system that allows adjustments in 2.5 cm increments along the entire height of the post. Available in stationary or mobile versions, the mobile units ensure secure transportation and facilitate the cleaning of storage areas. Designed for quick assembly and shipped knocked down to reduce freight costs, the units include 12.7 cm pivoting casters without brakes.

STEEL RACK

Metro End-Load Wire Tray Rack

The SmartTray™ system is engineered to improve productivity, minimize damage during PCB handling, and provide superior ESD protection. It accommodates boards of various sizes, ensuring safe and efficient management of sensitive components.

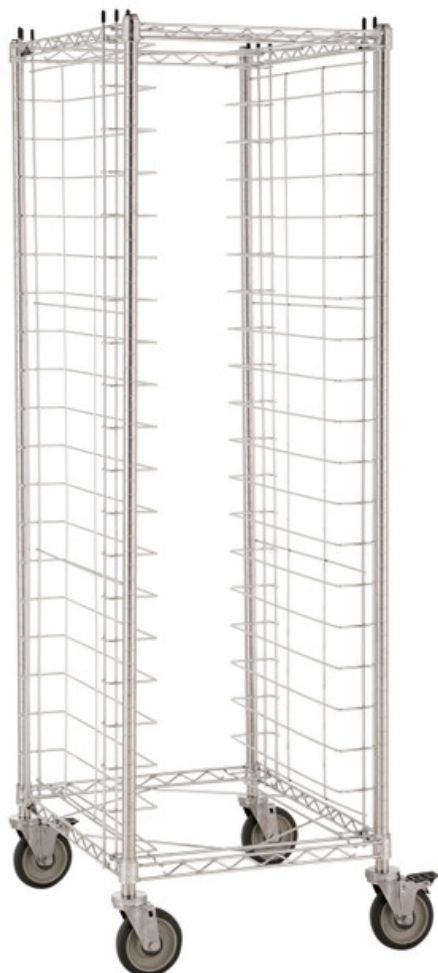

The tray racks, made from corrosion-resistant type 304 stainless steel, are easy to clean and designed to hold up to 20 standard 46x66 cm trays. Their durability makes them perfect for demanding work environments. Additionally, the carts are compatible with all industrial cleaning devices, supporting a weight capacity of 90 kg, with up to 13.6 kg per level, ensuring efficient storage and streamlined workflow while maintaining high safety standards.

Dimension of cart: 55,6 x 67,6 x 175(H) cm

Capacity: 20 trays/cart

Dimension of tray: 46 x 66 cm

Slide Spacing: 7,6cm

TOP- TRACK SYSTEM

**Increases storage
capacity by up to 40% !**

Designed to maximize storage capacity and enhance operational efficiency, the Metro Top-Track™ system is the ideal solution to optimize space and simplify material handling tasks.

1

**MAXIMIZED STORAGE
CAPACITY:**

Increases storage capacity by up to 40%, eliminating hard-to-reach or "dead" spaces with full access to every shelving unit.

2

EASY ACCESS:

The overhead track system creates a movable aisle between units, ensuring quick access to stored items while allowing easy movement for employees and utility carts.

3

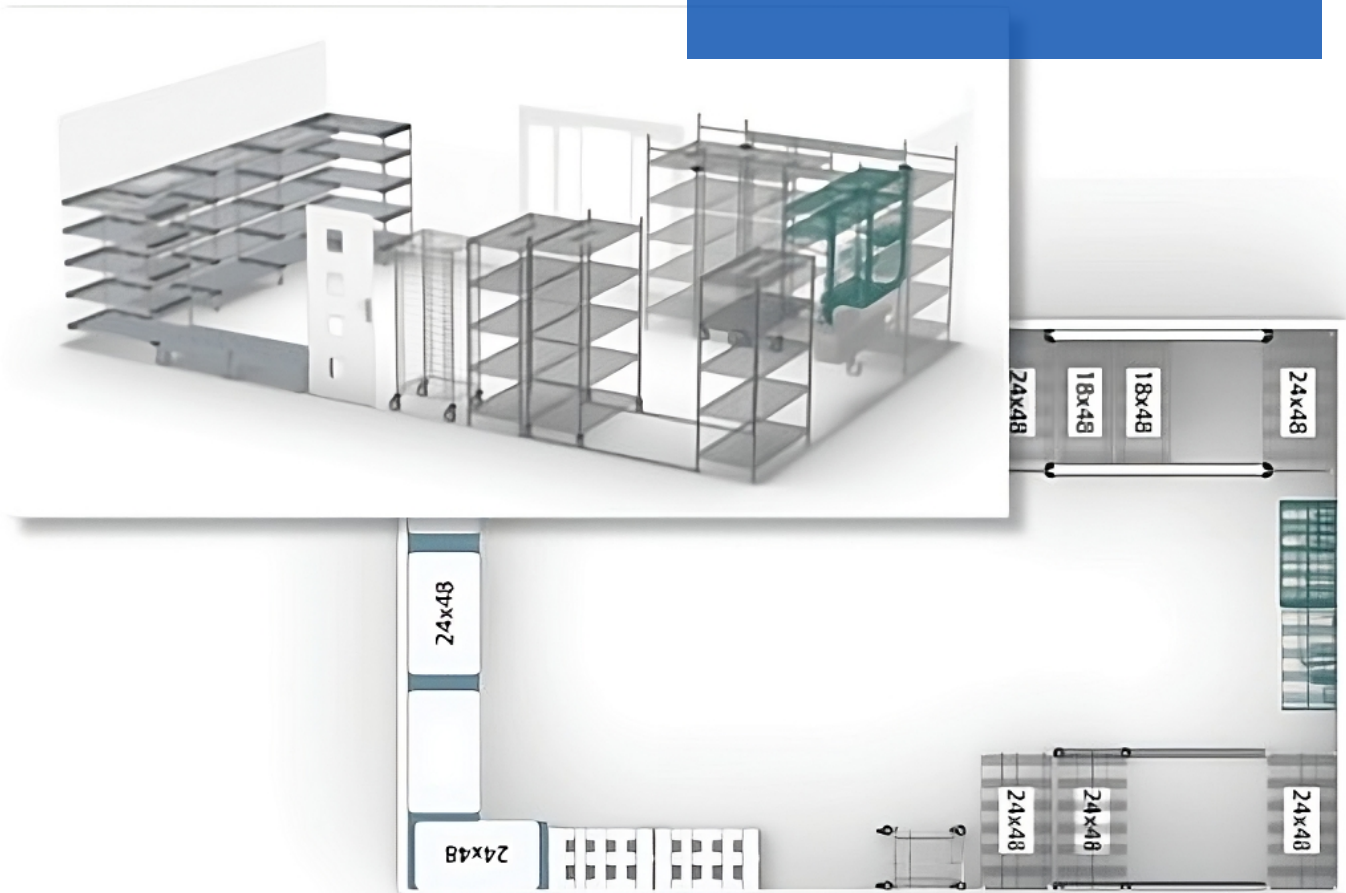

**CLEAN AND PRACTICAL
DESIGN:**

Overhead tracks simplify floor cleaning and compensate for slight floor unevenness, provided the surface is smooth and free of large cracks or obstacles.

Increases storage capacity by up to 40% !

Metro Top-Track™ combines efficiency, versatility, and cost savings for any operation, providing optimal space organization and ease of use.

CONTACT US TO
RECEIVE A
CUSTOMIZED 3D
RENDERING OF
YOUR LOGISTICS
OR PRODUCTION
AREA, TAILORED
TO YOUR UNIQUE
NEEDS!

4

COST SAVINGS:

By optimizing storage space, the system reduces the need for facility expansion or new warehouse construction, making it ideal for growing businesses.

5

INCREASED PRODUCTIVITY:

Frees up space for more profitable activities, such as operational or sales areas, maximizing daily revenue potential.
